

The Most Alive, Green, High-Protein, Plant Superfood You Can Eat!

Teacher.
Miracle worker.
Visionary.

These are just a few of the words that define ANN WIGMORE.

Brian Clement, Ph.D., LN

I have been advocating blue-green algae for decades. I am delighted to announce E3 SpirulinaLive, the new Florida-grown fresh-frozen algae. It is the finest, highest-quality Spirulina and the most superior protein food available today.

It has been nearly 20 years since Tamera Campbell and Michael Saiber began harvesting wild-grown AFA (*Aphanizomenon flos-aquae*) blue-green algae. And this is how it all began. Michael met and stayed with Dr. Ann Wigmore at **The Hippocrates Institute** in Boston over 40 years ago where he was introduced to raw, living foods.

Michael applied his knowledge that all foods are purest and most potent in their fresh, living form. He applied this same principle to the algae, and E3Live was born! When Michael and Tamera brought Anna Maria and I the live algae at Hippocrates, we were in a state of awe.

For years we had already used, and believed in, the dried form of AFA algae here at Hippocrates. But I always felt there had to be a better way. This fresh frozen algae brought the power of the AFA to a whole new level! We encouraged them to go through whatever they needed to do to bring it to Hippocrates and to the world. We believe that E3Live is beyond a superfood—it is the food of the future.

In the past I have never been impressed with Spirulina. Most powdered Spirulina is spray dried at

high heat, killing the enzymes and the life-force. Tamera and Michael spent a few years searching the world for a superior Spirulina that could be frozen and eaten raw, plus yield the results they were looking for. Their bar was set really high!

Through a colleague, Michael and Tamera were introduced to an amazing grower that exceeded all of their expectations. The irony is he lived 10 miles away from Michael and Tamera in Florida. Stunned and challenged by what they discovered, the first question was, “How could this be as good as E3Live’s AFA (blue-green algae)?”

So they studied and researched everything about how it was being grown including the water, the nutrients, the location and more. Then they shared their new fresh frozen Spirulina with key people in the health industry who they trusted and whose opinions they valued, including myself and Anna Maria. We loved the fact that Tamera and Michael had produced a completely raw, live, fresh-frozen Spirulina with no heat, resulting in a highly absorbable, digestible, powerhouse, plant protein. A partnership was formed with the grower, and E3 SpirulinaLive, the world’s first fresh-frozen, raw Spirulina was born.

Both the fresh-frozen E3Live AFA and the E3 SpirulinaLive are superior foundational foods. These ancient blue-green algae are considered the origin of life, Earth’s first plant food, serving as the base of the food chain.

What’s the difference? E3Live’s AFA is an algae that is wild grown in a high-mountain desert environment with low humidity. E3 SpirulinaLive is a tropical algae grown here in Florida next to the ocean in a high humidity environment. Moisture in the air acts as a prism for photons from the sun creating a full spectrum intensified nutrient supply to this tropical strain of blue green algae. For this reason, algae are the highest protein and energy food ever discovered.

In the raw, frozen form, E3 SpirulinaLive is completely digestible. As with E3Live, you’ll receive the highest concentration of raw plant protein of any food (60–70%). Spirulina is also the richest known source of both Phycocyanin and GLA—each known as a natural anti-inflammatory. It is rich in iron, B12, and chlorophyll, thereby making Spirulina another

E3 SpirulinaLive may promote:*

- ✘ A boost in energy
- ✘ Support for a healthy immune system
- ✘ Post workout supplement for healthy inflammation responses
- ✘ Fewer sugar cravings
- ✘ Assistance in the prevention of overeating
- ✘ Support for healthy intestinal flora
- ✘ Healthy response to allergies

one of the most nutrient-dense foods on the planet!

Athletes use spirulina for endurance and strength; it offers quick, long-lasting energy. It is also a boost for your immune system. With the revolutionary, breakthrough fresh-frozen E3 SpirulinaLive, you'll feel the difference! Besides the amazing benefits you'll receive from this fresh-frozen

superfood algae, it's easy to use! E3 SpirulinaLive comes in convenient, single-serve frozen sticks—all you need to do is tear open the top and plop your

Spirulina into water or juice. It dissolves quickly and it doesn't alter the taste like the powdered Spirulina does. It tastes good! Additionally, E3 SpirulinaLive will give any drink a nice creamy texture. ■

EDITOR'S NOTE:

I have been consuming and promoting E3Live's fresh-frozen AFA (see ad at right) for many years. Now, using the same great fresh-freezing technology and with this company's dedication to purity, and to delivering the most alive, green, high-protein, plant superfoods that you can eat, E3Live is now offering Spirulina as you've never seen or tasted it before. **You'll feel the difference!**

Call the toll-free number at the bottom right to order your cases of 32 packets for \$35.00 each. **NOTE**, because it is shipped fresh-frozen, they need to ship a minimum of six cases at a time. It stays fresh in your freezer for at least two years.
