"Hate • Woke • Wake • Hope!"

Finding Common Ground

A Cosmic Perspective by Mike Adams from the Health Ranger's "Situation Update" Podcast

EDITOR—This is excerpted and transcribed from one of Mike Adams' week-night podcasts, where he presents his analysis of current events via his alternative Internet platforms: Brighteon.com and Brighteon.tv. This Situation Update, broadcast on November 23, 2021, was titled: ***Australia Begins Covid Ethnic-Cleansing, Military Round-ups of Indigenous People.***

This issue is horrible in itself and well worth learning about. However, the chosen excerpts here are from Mike's opening and closing remarks, where he takes a broader perspective and waxes philosophical. He asks us to establish common ground, where people of all persuasions can agree that they value their freedom and their bodily autonomy—God-given rights that no government should infringe upon. ■

Welcome to the Situation Update for Tuesday, November 23rd, 2021. This is Mike Adams. Thank you for joining me.

I'm having a lot of difficulty putting together today's Situation Update, because there's so much chaos and confusion as we're watching society fall apart—the Rule of Law, the DOJ and the FBI coming in and destroying as much evidence as possible on the Wakesha, Wisconsin SUV killer, which happened over the weekend. We're seeing the rich get richer and the poor get poorer. We're seeing the warning signs of the bioweapons release that's coming and more push for more vaccines, including Fauci now saying he wants to vaccinate infants and toddlers, beginning in the first quarter of 2022.

And now in Australia, we have the military rounding up indigenous people and putting them into camps, whether they're sick or just in the same household. More details on that later...

But we're increasingly seeing that America—left, right, black, white, male or female or somewhere in between—all of us are done with the lies. Done with the wokism and radical violence. Done with the fake news media. Done with the vaccine mandates...

We can all agree on this central point that we own our body and can do with it what we want. We have to think about finding common ground. Black Lives Matter members are now agreeing on this same principle, because they know the history of experimentation on black people. Not just Tuskegee; this goes way beyond that, by the way...

As the governments become more tyrannical, they are driving these previously separate groups together. White Christians, Muslims, black activists, transgenders and gay people—everyone. What are they all marching about? No vaccine mandates. We own our bodies. Big government and corporate control is bad. We must refuse to take the bait of their attempts at divisiveness. All of us just want to live in peace. We must demand that everyone be left alone to live in peace.

I've lived in other countries, and most of the people I've met all over the world have been very nice people. Most people just want to raise a family, work an honest job, keep an honest day's wage, and NOT be terrorized by their government. That's universal. We would be a world of peace and abundance if it wasn't for government intervention. Every social, fiscal, and environment problem can be traced back to either mass money printing by the Federal Reserve, or to destructive government policies that reward the evil-doers and punish the productive members of society.

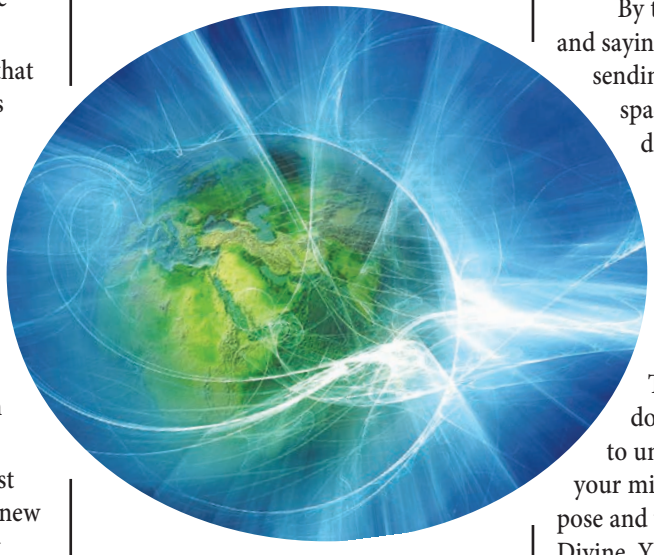
Big government and big central banks—these are the enemies of the world. And when they collude with Big Pharma and Big Tech and Big Media, it just gets worse. But this is the source of our problems, and I think the people of the world are finally waking up and realizing it everywhere, because the vaccine mandates, the mask mandates, and the lockdowns, and all this nonsense about Covid has brought out the pure evil of the governments that are terrorizing the people, as we're seeing in Australia right now and all across this incredible water planet.

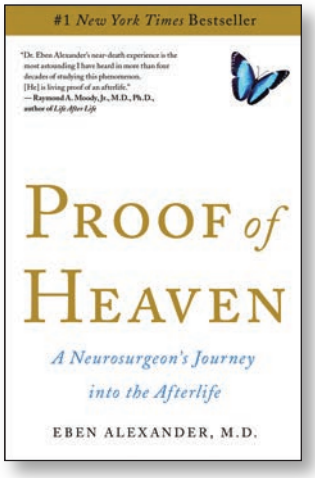
But humanity is about to choose a different path. And don't you want to be here to see that? I do. It's worth the suffering that we're about to go through in order to see the resurgence of a new Golden Age for human civilization and the downfall of the destroyers of our world—the downfall of the tyrants, the bioweapons pushers, the downfall of those who run experiments on children, the downfall of the depopulationists, the downfall of the globalists.

We are all going to live to see that day, but we must prepare, and that's exactly what we're all doing right now. We have to prepare, of course, spiritually, financially, and also with basic supplies, you know, with food and medicine and so on. And that's what we're all doing, and I'm just here to say, as a reminder, that you're doing the right thing. You're on the right path to make it through this.

And the dark winter will not last forever. There will be a new time, a new golden age, a new awakening, a new spiritual revival in America, and it's not that far away. Yes, there will be great suffering between now and then, but the suffering will NOT last forever. And humanity is going to choose a new course. And when it does, we want to bear witness to that transition. This is the greatest and most important time in human history, perhaps in cosmic history, because we know that what happens here on Earth affects the entire cosmos.

God is watching this planet. This is THE battleground for good versus evil in the cosmos. And those who have died and met God in the afterlife have been given that message. Read the book by Eben Alexander, ***Proof of Heaven***, a neurosurgeon and former atheist, who died because of a massive brain infection. He talked with God, and God showed him that Earth was the most evil planet in the entire cosmos. This is the most difficult battleground in the Universe! And for whatever reason, you and I chose this training ground, or proving ground, whatever it is, in order to demonstrate our incredible faith in God and to demonstrate that we are stronger than the evil that seeks to destroy us. And we will NOT surrender to that evil.





We didn't choose an easy, paradise world to have our human experience. We didn't choose just the vacation zones of the cosmos. For whatever reason, you and I chose this place to be here at this time in human history. We are here for a reason. And the reason is to stand up against this tyranny and take our stand in the cosmic tapestry of time and space and spiritual reality. This is the most important epoch and the most important thing that we can do for eternity, and for the entire past and future of our souls. And that is to say NO right now to these tyrants. Even if they take our biological lives, if we say NO, we are reborn, spiritually in a cosmic sense, and we gain the favor of God, and we win. Say NO to the tyranny and you win the 'simulation'—you get the winning score; you get the high score. You graduate from the simulation. OK? Understand that.

So, in other words, as you double down on your humanity and your freedom, you discover who you really are. You discover your purpose for being here. And it is a cosmic purpose of truly epic repercussions beyond anything that you or I can imagine.

By taking this stand for humanity and saying NO to the tyrants, we are sending shock-waves throughout space and time, through multiple dimensions. This is not an exaggeration and not just a figure of speech. What we do now is being noticed on a cosmic scale.

So that's the message I want to leave you with today. There's much work yet to be done for all of us. But I want you to understand the importance of your mission, shall we say, your purpose and your connection with the Divine. You are not here by accident. You're not listening to this podcast by accident. As much as I joke around and, you know, mock things and play around with fake, horrible, didgeridoo renditions, this is serious business.

But God has a sense of humor, too. He wants us to laugh from time to time—at ourselves and at the world and the insanity of it all. You know, the cosmos is a very funny place, actually. We just happen to be living in a point of concentrated hell, and we have to defeat that system and emerge from this and rejoin our Creator with our divinity and our human rights intact—with Truth and all of that. Everything we do matters. But have hope—we're winning.

So that's my podcast for today. I appreciate your patience and support and everything. God bless you. I'll be back with you tomorrow for another update. And let's hope we can keep our world together for another 24 hours. ■

Thank you for listening.
Take care.
