

Natural Joint Repair Without Pain Pills or Surgery!

My Story... Jennifer Carter, A Patient

I remember when I could ride my bike, rollerblade, play racquetball, ski, hike, and work in the garden for hours on end. Then, seemingly all of a sudden, everything changed. Now there was a price to pay for my activities—PAIN in my neck, back, shoulders, hands, knees, and feet! Eventually, I developed a tear in my rotator cuff and, despite a doctor-prescribed steroid shot and physical therapy, I was never fully functional or pain-free again. I learned to compensate with the other arm and embrace new sleep positions.

One day while working in the garden, my back went out. I spent that summer unable to stand upright or walk without pain. I spent hours lying flat. After a few months, despair set in. As a 40-something mom of three young children, I was in no position to be down like this. My family needed me!

Finally, I tried a chiropractor. I was walking again in just three visits. I was thrilled to have mobility back, but my abilities were limited, and my activities usually left me in pain. For a couple more years, I went back and forth from being just okay to not being able to walk. Each time, I would run to the chiropractor and have him “fix” me. My biggest sorrow was telling my kids, “Mommy can’t play with you or I will get hurt.”

Fast forward to last Fall. My husband had been researching what the pro athletes were using to recover from injuries, and he learned about natural alternatives

for joint repair through the use of umbilical-cord-tissue remedies. He has had over 20 surgeries as the result of a bad car accident, and we were excited that he might get relief from his joint and arthritis pain. He found the Joint Repair Clinic of Montana that was excellent in both quality and price. He encouraged me to get my shoulder looked at.

The program is designed to help your body heal, so it is not intended to be an overnight quick fix. Patients can have a reduction in inflammation, thus reducing the pain associated with injury or arthritis. Over time the body can repair tendons, ligaments and cartilage, increase bone density, and strengthen muscle. After a few weeks, I found myself waking from a good night’s sleep, even lying on my bad side with no pain. It seemed miraculous! And then I could position my arm straight up and over my head without pain. It was incredible to get these results in such a short time!

Three months later, I returned to the Joint Repair

Clinic to get help for my neck and low back. X-rays indicated degeneration in both, which was logical considering the pain and other issues I was having. This time, I got the full package, which included supplements and a chiropractic plan with We Care Chiropractic. This would not just deal with the onset of pain, but would get to the source of my issues, so I would no longer have to always live on the upper end of the pain scale.

All I can say is—thanks to the Joint Repair Clinic of MT. I have been given back the life I thought was gone forever! I now get a good night’s sleep. I feel more youthful and energetic. My range of motion is back, and my pain is GONE! My back hasn’t failed me in the seven months since I began this wellness journey. I can now wrestle with my son, ride bikes with my family, play ball, swim, work hard, and have fun again! I am so grateful that I have been able to avoid surgery. I now have hope that I will be able to live the rest of my life without joint pain! ■

The Joint Repair Clinic of Montana (with locations in Bozeman, Billings, Missoula, and Helena) has been helping many Montanans attain great results from arthritis, joint pain, and peripheral neuropathy. The professional staff uses measurable, scientific testing and x-rays to understand what is going on with your joints to help determine what may be the source of your pain. They can help you learn about the natural options that may be available for you and offer personalized-care programs to help your body naturally. They utilize the tissue from donated umbilical cords from live-birth, healthy moms and healthy babies, which helps the cushioning in your joints.

Care packages can include (Human Umbilical Cord Tissue (HUCT) Allograft, Platelet-Rich Plasma (PRP), chiropractic, ozone therapy, nutritional guidelines, and home exercise counseling. They have helped many achieve decreased discomfort and increased vitality—to feel younger again and enjoy their work, hobbies, and family to the fullest!
