

Swedish Pollen Extract:

VITAMINS:

Provitamin A
(carotenoids)
B1 Thiamine
B2 Riboflavin
Niacin
B6 Pyridoxine
Pantothenic Acid
Biotin
B12
Folic Acid
Choline
Inositol
Vitamin C
Vitamin D
Vitamin E
Vitamin K
Rutin

MINERALS:

Calcium
Phosphorus
Potassium
Sulphur
Sodium
Chlorine
Magnesium
Iron
Manganese
Copper
Iodine
Zinc
Silicon
Chromium
Molybdenum
Boron
Titanium

CAROTENOIDS:

Beta-carotene
Xanthophylls
Zeaxanthin
Lycopene
Crocetin

ESSENTIAL

AMINO ACIDS:

Tryptophan
Histidine
Isoleucine
Leucine
Lysine
Methionine
Phenylalanine
Threonine
Valine
Arginine

Nature's Ultimate Superfood

A full-spectrum of hundreds of essential micronutrients at the source of the food chain.

Take as directed by your health-care practitioner; 1/8th to 1 teaspoon for daily or occasional use. 375 mg per 1/8th teaspoon

Bulk powder quantity: 33,000 milligrams
No pill or capsule binders or fillers.

SWEDISH FLOWER POLLEN EXTRACT NUTRACEUTICAL GRADE "ROYAL JELLY"

BEE-FREE * Harvested without the bees
GMO-FREE * Grown without GMO crops
CHEMICAL-FREE * Extracted w/out chems
ALLERGY-FREE * Enzymatically predigested

Nature's richest source of RNA/DNA genetic material for cell replication, regeneration, repair and optimal immune function.

HIGHLY CONCENTRATED - PURE EXTRACT POWDER

It has a long, rich history—used by emperors and Olympians—now with advanced biotech for purity and potency.

The best-kept secret of the ultra-healthy and used by immunologists worldwide.

SPX was a life-changing discovery for me. You'll love what it can do for you!

If you appreciate extraordinary health tips, consider what this ultimate superfood is, how it works, how to take it, and the miraculous, health-elixir you can make with it at home. But first, let me be clear on the huge—but often confused—difference between *bee pollen* and *royal jelly*.

Bee pollen is what bees collect to make honey from flowers' sweet nectar. That *nectar* is the perfect food for fungus and bacteria, which the bees transmute naturally when they make honey. But when you eat raw bee pollen, the 'buzz' you may get is not healthy energy, but a toxic-shock reaction to all the fungus and bacteria! Most people don't know this.

Beekeepers often sell their bee pollen as a superfood, not mentioning the levels of fungus, bacteria, and bee legs and wings that are torn off in pollen traps while taking the hive's food. My point is that bee pollen and pollen extract 'royal jelly' are as different as a bicycle and a Tesla supercar!

Realize that royal jelly is what bees suck out of microscopic pollen grains to store and feed to a bee larvae when the hive needs a queen bee. So it's not bee genetics that makes a queen bee—it's this royal jelly superfood. This is the richest source of RNA and DNA genetic material at the original source of the food chain. All the elements for sparking life in nature are concentrated in this whole-food extract at the heart of those microscopic pollen grains.

The miracle of SPX is how it transforms a normal worker bee larvae into a much larger,

Nutraceutical grade 'royal jelly' also known as 'SPX' (Swedish Pollen Extract)

healthier, and prolific queen bee that sometimes produces its own weight in bee eggs each day! And the queen bee lives two-to-three times longer than other bees.

If you were a fish, I'd say the ultimate superfood would be a micro-algae like spirulina or chlorella. But us land-based creatures have genetically evolved with land-based food that is all sourced back to pollen.

The Swedes developed the science of *pollenology* more than 70 years ago, producing the skin 'prick test'—called the RAST test—used by allergy doctors worldwide. When I was a teenager, I had pollen allergies but got rid of them for life after taking two rounds of pollen pills. Those pollen pills have come a long way in the last 50 years, thanks to modern biotechnology.

The Swedes now have three, international-patented processes for producing Swedish Pollen Extract (SPX). They harvest select pollens without the bees for quality control. Their research discovered which combined pollen extracts have the ideal micronutrient precursors for stem cells, which optimize cellular rejuvenation. Once these select pollens are harvested, their nucleus is extracted from their microscopic shells. And finally, this rich, nucleic material is pre-digested with enzymes that make it easy to assimilate—with no allergic side-effects.

I heard about this company in Sweden 35 years ago, where they had just developed a new shredding process—without chemical solvents—for extracting the nucleic material

from the rock-hard microscopic shells. This made the extract much purer for nutraceutical and pharmaceutical applications. As a clinical nutritionist at the time, I realized that this was a purer form of royal jelly that Chinese emperors would buy with an equal weight in gold. I knew this was the best superfood for human health on the planet.

So in 1987, I went to Sweden and pitched them on a strategy to expand into North American markets. I was granted those rights and brokered this product to the largest nutrition companies in Canada and the US for years.

Eventually, the Swedish company was bought by one of the largest Big Pharma companies in America. They use it in drip-IVs for immunotherapy. It brings back the immune system after it is wiped out by chemo and radiation, so it's a huge, worldwide market for the burgeoning cancer industry. Never mind that medical protocols could prevent or cure cancer with the SPX alone in oral form. I've seen the research, and I've heard the many testimonials over the years... but I can't make medical claims without SPX crossing the line from whole-food concentrate to a highly regulated drug, which is then under FDA control.

Fortunately, I was grandfathered in for my service to this company, and I've continued supplying clinics and health centers. The health benefits of SPX are enormous, specifically providing vital force in the body for more energy, strong immunity, and mental clarity.

SPX is like a full-spectrum, nutritional rocket fuel for the energy factory in every cell in your body—the mitochondria. And all the stem-cell, micronutrient factors facilitate a stronger immune system. The miracle of the queen bee is seen in the miracle of cellular rejuvenation, vitality, and life extension.

I could go into the long history of the use and health benefits of SPX for prostatitis, urethritis, and other inflammations in the body, but again, I must avoid medical claims. For five decades, SPX has also been widely used in Europe as a preventive and treatment for colds and flu, but that science doesn't fit the current Covid narrative, so I also avoid it.

Cassius Clay (Muhammad Ali) trained on SPX. Remember his "sting like a bee"? Numerous Olympians have also trained on it, including gymnasts Mary Lou Retton and Julian McNamara. Their coach, Bella Karolyi, said, "I firmly believe Pollen Extract is the ultimate food supplement in sports nutrition."

Pollen extract is like the male sperm of the plant kingdom. One healthy side-effect for males is an increase in sperm count. Fifty years ago, you never heard of reproduction clinics, but now it is a giant industry, and infertility is becoming epidemic.

"Pollen power from the flower" is highly concentrated in SPX. You only need a quarter teaspoon per day for a health-sustaining, preventive dose. For health-optimizing levels, I personally use it two or three times daily, depending on stress levels. In the bio-med world, SPX is known as an 'adaptogen'—helping the body adapt to stressors to the body, mind or emotions.

Christopher Rudy
Christopher L. Rudy
UltraMedics Director

SPX is in powder form because it dissolves under the tongue and passes sublingually through the blood-brain barrier to provide neuro-transmitter precursors for increased mental clarity. Sustained energy with clear thinking is why many computer workstation professionals use SPX.

Don't take the SPX after mid-afternoon, or you may have difficulty sleeping on your regular schedule. It's a very subtle energy, but some people are more sensitive than others. And I caution against using too much too often or it can trigger 'cellular detox' (flu-like symptoms), when the body has the additional vital force to clear out cellular waste in the biological terrain.

Saint Germain, known as the Wonder Man of Europe, used a miracle elixir that caused him to never age. My understanding is that this elixir had royal jelly in it. I would not be surprised if it also had ginseng, flower essences, and essential fatty acids—like evening primrose oil—that are known to complement and synergize the biological benefits of royal jelly.

If you want, you can create your own custom, miracle-elixir combo by adding inexpensive flax seed oil, Siberian ginseng, and other botanicals to SPX. Make yourself a blender drink before breaking your overnight fast—your 'break-fast.' SPX is great for sustaining your body on a modified fast, or when breaking a fast with this custom elixir. You'll go **faster**, with a **higher frequency**, if you do! You'll have more vital force in body, mind and spirit. So, be free to thrive with bee-free SPX! ■
