

50 Years... Pioneering an Aquarian Vision

A Reflection of Universal  in the Global Mind

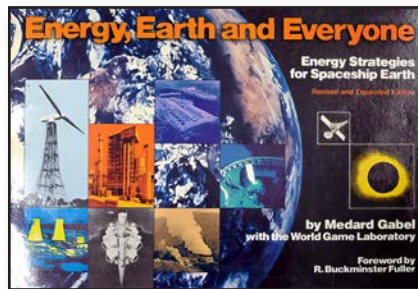

Christopher Rudy
“Meta-Physician”

Back in 1974, I addressed ten agencies of the Fed-Gov on Capitol Hill. Finally, we’re seeing the Aquarian Quantum Age gain some traction!

Fifty years ago, in July of ‘74, I attended Buckminster Fuller’s month-long [World Game Studies Workshop](#) at the University of Pennsylvania. We did future modeling of the abundant energy capabilities of hydrogen-fuel-cell technology, that utilizes specific frequencies to split the H₂O water molecule and separate the Hydrogen fuel for burning with the oxygen component to power cars and clean energy generators for home and industry. No toxic combustion side-effects.

Back at that time, Stanley Myers and others were running cars across the country by simply putting water in the fuel tank. This simple, quantum tech-

nology—utilizing frequency to split the water molecule—was demonstrably proven, and the implications were vast. **This is the book we published from our research:**

In the Foreword, R. Buckminster Fuller wrote:

“This book makes it incontestably clear that it is feasible to harvest enough... energy... to provide all humanity and all their generations to come with a higher standard of living and greater freedoms than ever have been experienced by any humans and to do so by 1985, while completely phasing out all further use or development of fossil fuels, atomic and fusion energies.”

Of course, this was disruptive technology, disrupting the Big Oil status quo monopoly. Stanley Meyer was assassinated after refusing to back down on a mass production facility. In Germany, Mercedes Benz produced some buses that ran on the water fuel cell, but they were

shut down. In Japan, a company went into production of a small car that ran on water...

...but they were also shut down. Are we now seeing a Great Awakening to quantum water power folks?

[Hydrogen-Burning Alpenglou Hypercar Is About to Go Endurance Racing](#)

April 14, 2024 / New Atlas:
“After a couple of hell-raising concept iterations, Alpine’s hydrogen combustion fire-and-ice Alpenglou super-racer is finally prepped and revved up for the track. It’ll make its dynamic debut next month at the Spa-Francorchamps 6-Hour Endurance Event in Belgium, running its hydrogen combustion engine on its first public outing.”

**The denial of abundant H₂O energy for all is not for the lack of the how-to science—
IT’S ABOUT THE MONEY...**

Trillions of dollars are at stake for Big Oil, so they bankroll

the climate crisis industry—controlled opposition—blaming bogus CO₂ emissions, like they blamed an invisible virus with the same hyped-up warnings of mass casualties if we don't take the shot, lock down society, and surrender our sovereignty for security—until we had neither.

Look how that has worked out! The “pharmacidal” medical-industrial complex makes a killing on vaccines—in the short term—and profits ten-fold on a life time of harmful side effects. They lied that they were safe and effective, and now they deny there are millions worldwide who have been killed or severely harmed.

“Ever since the COVID-19 vaccine came out, 1.1 million Americans have died excessively, 4 million were permanently disabled, and another 28 million were seriously injured.”

~ Article by Edward Dowd, [HERE](#)

Personally, I had my children ‘vaccinated’ with nontoxic homeopathic nosodes by a medical doctor who was also a homeopath. Now they have their own children, and I strongly advise them to avoid the highly toxic new mRNA shots that are genetically modifying kids with an [insane injection schedule of 64 shots](#).

Listen to what Joe Rogan clearly stated recently—2 minute video [HERE](#)—about the medical hypocrisy of “mass pharmacide” with mRNA shots. *But I digress...*

While at Bucky's World Game, I gave a lecture on the

trending future of breakthrough communication technologies for upgrading our core Constitutional freedoms of speech, assembly, etc.

Some of the attendees of World Game were members of the **World Future Society** and **Barbara Marx Hubbard's Committee for the Future**, and after my lecture, they asked me to give the highlights of my lecture to ten agencies of the Federal Government a few months later at a ‘Futures Summit’ that debriefed the U.S. Government on scenarios for celebrating the Bicentennial Era from 1776 to 1789—the 13 years from the Declaration of Independence to ratification of the Constitution.

Full article [HERE](#).

After 3 days of presentations in the Science and Astronautics Chamber of the Rayburn Building on Capitol Hill, I gave the concluding address, summing up a systemic upgrade of our horse-and-buggy representation systems with an electronic ‘space age’ update of our core freedoms to shine for the world as the American Revolution once did.

In about ten minutes, I summed up how all social problems are, at core, communication problems—with a communications solution.

At that time, 50 years ago, cable TV systems with satellite downlinks had just wired the nation with mandates for public access channels open to citizen interaction. I explained how that interaction could be optimized with an update of our [Core Constitutional Freedoms](#), utilizing minicomputers at public-access stations. These could process instant evaluation of content by hundreds or thousands of viewers simultaneously—an electronic town-hall meeting—that qualifies consensus with a ‘universal interface’ ([light language](#)), as represents the language of consciousness itself.

Fifty years later, the ‘head-end’ for that ‘public access channel’ could be one’s smartphone, laptop or desk-top computer, utilizing the ‘universal interface’ ([Heartware](#)), as the next major phase of the computer-Internet revolution, after the emphasis of ‘hardware’ (IBM), ‘software’ (Micro-soft), and ‘netware’ (Netscape).

This opportunity—to upgrade our [Five Core Internet Freedoms](#) with enlightened social conscience—is for the evolutionary ascent of the Family of Mankind in our new all-connected global village.

The ‘final frontier’ for ‘US’ as United Sovereigns of Earth will thus be explored with our new ability to navigate ‘inner space’ on the InnerNet with the interactive capability of [Web 3.0 CyberEthics](#) (Heartware).

This has been a work of  for me... Fifty years developing the [Heartware Project](#) for cooperative communication and coordination between East and West... providing **unity consciousness** for global **rEVOLUTION**, emphasizing 90% of the word.

[The Unified Field of Consciousness](#)

“Consciousness is never experienced in the plural—only in the singular. The total number of minds in the universe is ONE. In fact, consciousness is a singularity phasing within all beings.”

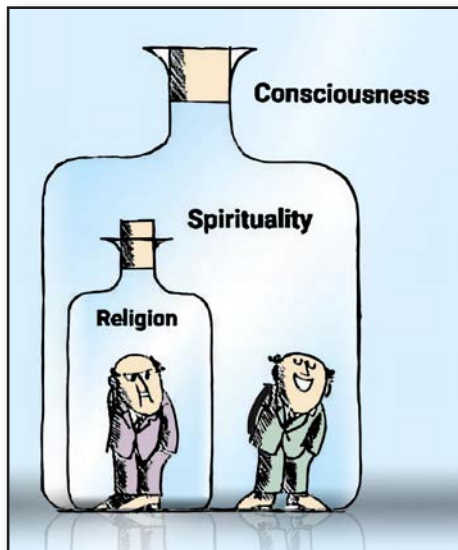

~ Erwin Schrodinger,
Nobel Prize in Physics

Spiritualizing matter on Earth as in Heaven is an uplifting process that acts as the leaven for the ‘Bread of Life’—it’s **LOVE-in-Action** to neutralize evil and transcend all faction!

By culturing social conscience in our ubiquitous social-network **communities**, we are, in fact, ‘comm-unity building’ (coming into unity), with decentralized, open, transparent communications for a ‘New Common Sense’ of **“We are One”!**

The [Aquarian Quantum Age](#) has arrived; energy **fields within fields** now realized. [TeLeCare](#) is a function of [TeLeComm](#); our global holistic healing supervised.

“Aspire to inspire before you retire or expire!”

This **Come-into-Unity** process—emphasizing the **TLC** in **TeLeComm** and **TeLeCare**—is a form of sacred **communion** with Cosmic Law as [Universal Law Language](#), framing the Constitution of natural-law principles and quantum processes operating from the atomic to the galactic.

This process of identifying with—**resonating with**—more frequent frequencies of global **TLC** is the ‘**Creative Ascent Process**’ (CAP), known as the CAPstone of our individual and collective identity.

This conscientious evolutionary ascent process is also known as ‘**Information’s Ecology**’—recycling general knowledge in the way that empowers specific wisdom—[heart coherence](#) with [mind congruence](#)—a higher concept of  as:

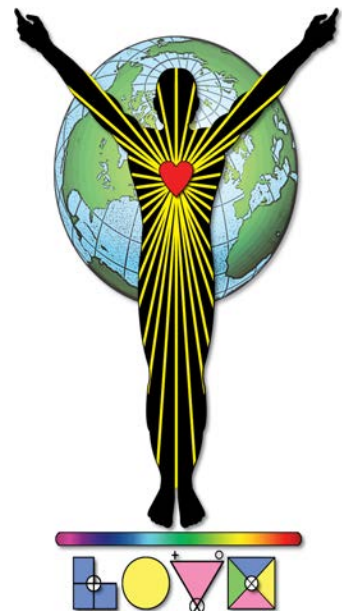

the [Language of the Angels](#) and [Law of the Angles](#)—the **heart** and mind of ‘G.O.D.’—(Geometric Ordered Divinity)... for the [Aquarian Quantum Age](#) of Light and

...Defining, refining and shining a ‘**New Common Sense**’—East Meets West with a Universal Heartware Interface for the Family of Mankind in our unified Global Village!

This is the intent of the [Heartware Project](#) for conscientious evolutionary ascent of social conscience in our social networks!

So, Keep the Faith;
Hold the Vision.
See the Good;
Sustain the Virtue.
And **Make it So!**
Claim the Victory.

The Aquarian Quantum Age may be much different from what you imagined, yet much better than you ever thought possible!

Bottom Line—Higher Power:

with all your strength, mind, heart, and soul, and your all-connected Netizen neighbors as thyself. ■
