

The Silence and Peace Experience

Naturally, the Earth is beautiful, loving, and ever-giving. Nature flows effortlessly, embracing change as a constant. Just

as nature embodies balance, so too does humanity have the innate ability to embody love in action. We care for each other and our planet because, at our core, we are one—united in peace and harmony.

This transformation, known as the Divine Age or the Jubilee Age as some of you may refer to it, is happening now, both within us and around us. It is a time of awakening, where the darkness of ignorance is replaced by the light of Supreme Love, Peace, and Joy. Can we truly see, feel, and experience this shift, even amidst the challenges of the outer world? The Light of Love will turn ignorance into Divine Love. Spiritual guide and humanitarian Maitreyi Dadashreeji shares a simple yet profound truth:

“If you feel disturbed, the antidote is peace. When you acknowledge ‘I am disturbed,’ it tends to intensify. Instead, embrace the thought ‘I am peace,’ and everything begins to settle internally.”

By affirming “I am peace” daily, we align our emotions and thoughts with the essence of peace. Just 10 minutes of stillness each day can help cultivate this inner harmony.
